**Schedule of Wholesale Rate**

A wholesaler is a person or entity which collects the sewerage of one or more customers through the use of wholesaler's own mains and which charges a fee approved by this Commission for such service. In turn, the combined collected sewerage is discharged into a Bush River Utilities main.

The monthly service charge to a wholesaler shall be computed by aggregating the monthly service charges which Bush River would charge each customer if the customer was directly on Bush River's system. Seventy-five (75%) percent of this aggregate figure will be charged to the wholesaler as a monthly service charge. No charges may be rendered directly to any customer or wholesaler.

The monthly service charge shall be computed and adjusted annually and when a change is approved to the rate schedule of Bush River.

**Schedule of Tap Fees**

The "Water Pollution Control Division Guidelines for Unit Contributory Loadings of Wastewater Treatment Facilities (1990)" are incorporated herein by reference. To determine tap fees the following formula is used if the customers' Bio-Chemical Oxygen Demand (BOD) factor is greater than the BOD factor for a resident:

$$\frac{\text{Total Volume (gpd)}}{400 \text{ (gpd)}} \times \frac{\text{Unit BOD of Customer/100gal.}}{0.17 \text{ lbs.}} \times \$300.00$$

If the customer's BOD factor is less than the BOD factor of an equal volume of residential waste, the following formula should be used:

$$\frac{\text{Total Volume (gpd)}}{400 \text{ (gpd)}} \times \$300.00$$
